DTV

Valve Type

DTV series is designed for electronic valve applications. It is user-friendly and easy to use. DTV has built-in MODBUS communication, which allows handier data collection.

DTV also features:

- Auto/manual mode switching by a single key
- "Left" key makes the parameter setting faster
- Real-time output percentage display, for the user to check the openness of the valve
- 2 alarm outputs, 17 alarm modes
- RS-485 communication interface for DTV to monitor and collect data from other temperature controllers on the network
